

**DXC Red Rock Asset
for Oracle®**

Smarter resource management. Smoother projects.

Key features:

- Ready-to-deploy Cloud solution
- Prebuilt and tested
- Designed for your industry
- Specialist industry application extensions
- Delivered with accelerators
- Bundled managed services
- Bundled test scripts, training material, security, data conversion, integrations, forms and reports

Benefits:

- Rapid deployment
- Minimal disruption
- Simplified upgrade/scale
- End-to-end support
- Information transparency
- Improved reporting
- Consume model pricing
- Lower cost of ownership

The engineering and construction sector is changing, fast. Increasing competition. Scarce resources. Regulatory disruption. Tighter timeframes. Even tighter margins. It's more important than ever to deliver projects efficiently – on time, on budget, to meet forecast margins. Billing efficiently, containing costs, and impressing customers calls for collaboration, innovation and timely decision making based on real-time business data. It demands more agile applications that integrate seamlessly.

Traditional resource management processes and ERP systems lack the requisite integration and flexibility. Many firms are struggling with ageing, siloed legacy systems that prove inadequate when it comes to reporting a 'single version of the truth'. But the solution is here. Preconfigured. Ready to implement. Designed specifically for your sector on tier-one software, backed by a award-winning Oracle® Partner.

Introducing Red Rock Asset

Red Rock Asset is a ready-to-go Cloud ERP solution created specifically for engineering and construction firms – part of our Red Rock Industry Solutions suite that's designed to meet the unique demands of different industries.

Drawing on our in-house ERP and engineering and construction expertise, we've preconfigured market leading Oracle® Application technologies to create an all-in-one ERP solution that will enable, empower and add tangible value to your business from day one.

Everything is factored in – process maps, integrations, data migrations, mobile apps, forms, reports, legislative requirements, master data, security, training – so it's optimised to provide all the functionality and capabilities your firm needs, all with best-practice compliance and governance in mind.

Rapid implementation.
Leverage the system's capabilities and business value sooner.

Immediate upgrades.
Access enhanced functionality and upgrades instantly.

Consumption-based charging.
Pay for what you use and minimise costs.

Preconfigured industry-specific solution

Customised implementation

Red Rock ERP insights and IP

Ongoing operational support

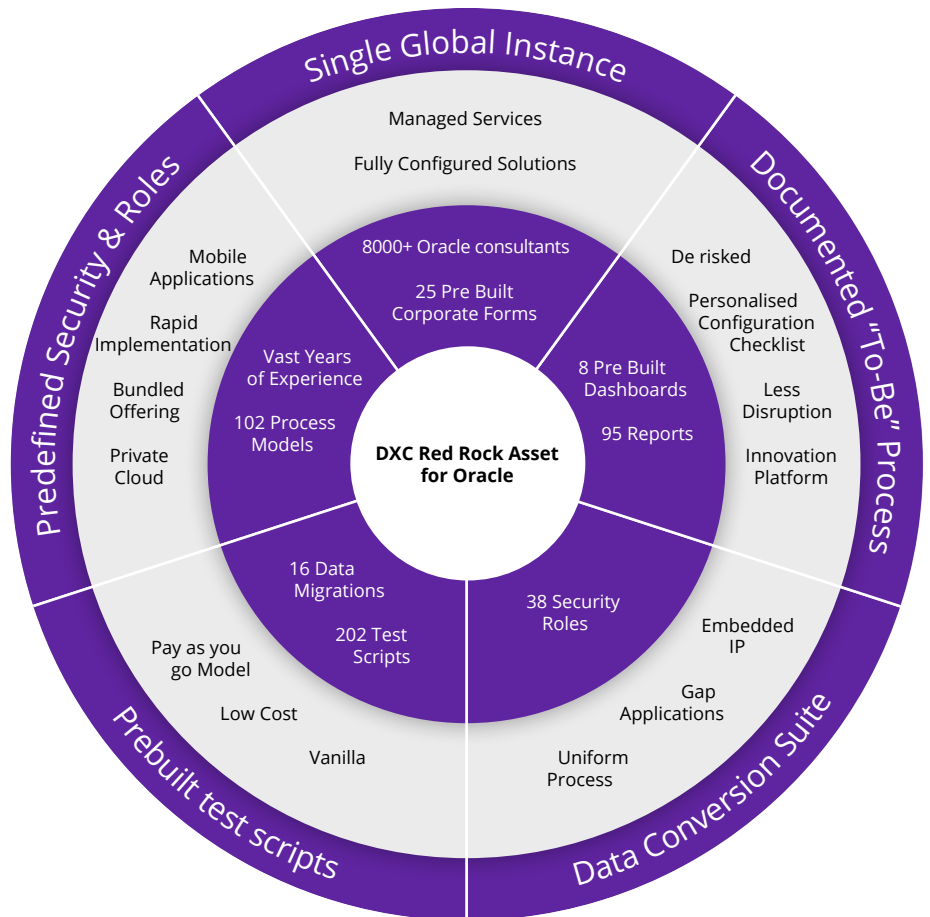

Licence management and optimisation

Pay for what you use, and use it sooner

Because Red Rock Asset is preconfigured for your industry, implementation is fast—implementations typically take half the time of traditional ERP system implementations. This provides an accelerated path to value, enabling people across your organisation to access accurate business information, deeper insights and built-for-purpose ERP functionality, with upgrades included to enable technology adoption at pace.

What do you get with Red Rock Asset?

Each Red Rock Industry Solution includes prebuilt configuration, intellectual property, customerspecific implementation requirements, ongoing 'run' and licensing if needed.

- Australia and New Zealand's largest Oracle partner practice
- 20+ years' delivering Oracle solutions
- Hundreds of successful ERP implementations
- Small start-ups to tier-one enterprises
- Proven methodology and governance
- Market-leading ERP insights and IP

About DXC Red Rock
